**How to tell your age by beer math.**

This is kinda weird but fun anyway. Give it a try.

- 1. Pick the number of times a week that you would like to have a beer (more than once but less than 10)**
- 2. Multiply this number by 2 (just to be a little more honest)**
- 3. Add 5**
- 4. Multiply by 50 (go get a calculator if you need to)**
- 5. If you have already had your birthday this year, add 1760. If you haven't yet, add 1759.**
- 6. Now subtract the four digit year that you were born. You should have a three digit number.**

The first digit is your original number (how many times you wanted a beer)! The next two numbers are your age!

Just proof that beer is good for brain development!
